WORK EXPERIENCE

General Assembly • Web Developer in training   **2017**

- Developed, and deployed full stack applications working independently and as part of a team, while participating in their 12 week hands-on immersive program.

   Projects

- **EzSpeaky**
  Full-stack ember.js app designed for parents whose children with cleft lip and cleft palate need access to speech therapy methods. Designed data architecture in SQL via rails.

- **ULink to Code**
  Full-stack application for users to add and organize web resources to learn coding.Users have CRUD capabilities to interact with the site, which is seeded in a PostgresSQL database on the back-end.

- **Magic Box**
  Web app that allows users to upload personal files and keep them organized by tags. It was built using an Express API powered by MongoDB and a separate client app built using JavaScript.

Spaulding Hospital-Harvard • Exchange Visitor Program Specialist   **2014-2016**

- Reduced the ongoing professional practice evaluation process by 200% transitioning to an automated process with the use of Visual basic (VBA) and Excel.

Worcester Dept. of Public Health • Research Analyst   **2013-2014**

- Conducted social network analyses utilizing NodeXL and Gephi software to identify gaps in social services provided to victims of human trafficking.
